

NutrigeneAI Biotech Selected for Qianhai Shenzhen-Hong Kong Youth Innovation and Entrepreneur Hub (InnoHub) Incubation Program

January, 2025, Shenzhen, China–

NutrigeneAI Biotech Limited, a Hong Kong-based biotechnology company founded by Professor Jack Wong, Mr. Gary Ng, and Mr. Coby Ke, has been officially selected for the incubation program of the Qianhai Shenzhen-Hong Kong Youth Innovation and Entrepreneur Hub (InnoHub). This milestone reflects the company's strong commitment to advancing biotechnology innovation in alignment with China's national strategy and the Greater Bay Area development blueprint.

NutrigeneAI focuses on translational research in iPSC (induced pluripotent stem cell) technologies, precision medicine, and next-generation healthcare applications. By leveraging the resources of both Shenzhen and Hong Kong, the company seeks to integrate advanced research, commercialization, and clinical application, contributing to the long-term vision of developing new quality productive forces in the Guangdong-Hong Kong-Macao Greater Bay Area.

The company's selection into the InnoHub program follows a rigorous review process, where NutrigeneAI emerged among over 100 competing teams. As an incubated company, NutrigeneAI will benefit from a wide range of government-backed resources, including rental subsidies, R&D funding, entrepreneurial support, housing allowances, investment opportunities, and preferential tax incentives.

NutrigeneAI's incubation also aligns with the 1510 development model introduced by Qianhai, which includes RMB 5 billion in fund support, 100,000 square meters of industrial space, and HKD 1 symbolic entry cost for startups. This initiative highlights Qianhai's commitment to fostering innovation and strengthening cross-border collaboration between Shenzhen and Hong Kong.

夢工場推出「1510」發展模式 打造具有國際影響力的深港創新創業平臺

堅持依托香港、服務內地、面向世界，系統推進夢工場發展模式，為深港深度合作發展提供新質生產力「空間著力點」、「集中承載地」和「成果匯聚區」，聚焦深港創新合作打造夢工場「1510」發展模式。
